COMPOSITE SYSTEMS

Universal application
LASTING SOLUTION

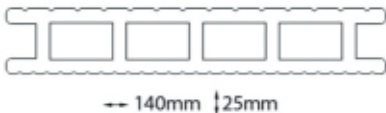

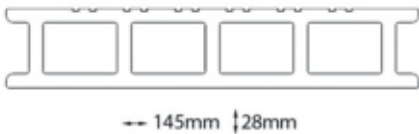

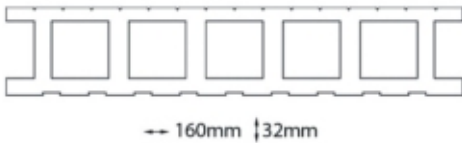

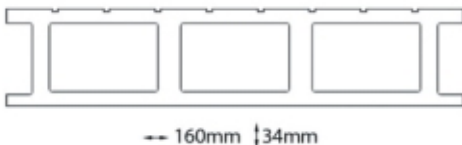

TERRACE SYSTEM

(terraces, balconies, swimming pool edges, jetties)

TERRACE BOARDS by GlobalDeck – they combine the advantages of natural wood with the modern properties of plastic. Visually they resemble wood, but they have much higher usability parameters. The use of this mixture: specifically selected wood meal with PVC guarantees achieving a material that is waterproof and resistant to changing weather conditions.

The variety of patterns, colours and structures of the GlobalDeck terrace boards allows for unlimited design possibilities, even for the most demanding solutions. The way in which the GlobalDeck terrace boards are installed with clips guarantees an aesthetically pleasing surface – without visible screws or nails. The GlobalDeck terrace boards are made in a double-sided version. Depending on their type they possess a smooth or engraved and polished or brushed surface. It is possible to manufacture a GlobalDeck terrace board in custom sizes, per the client's request.

TYPE OF THE GLOBALDECK TERRACE BOARD	CROSS SECTION	COLOUR	TRIM
DKP 25		hazel graphite brown	engraved on both sides
DKP 28			engraved on one side
DKP 32			engraved on both sides
DKP 36			engraved on one side

Trimming (structure) of the surface of the GlobalDeck terrace boards:

Brushed

ELEVATION SYSTEM

The GlobalDeck ELEVATION BOARDS combine aesthetics and usability advantages. Visually they resemble wood, but have much higher usability parameters. The GlobalDeck elevation boards are waterproof and resistant to changing weather conditions.

The variety of colours and trimming methods of the GlobalDeck elevation boards allows for unlimited design possibilities, even for the most demanding solutions. The GlobalDeck elevation boards are a modern elevation surface inspired by natural wood. They allow for a fast and practical arrangement of any building. They offer a fast installation with the use of only standard tools.

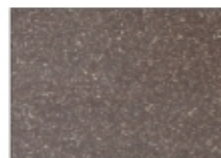

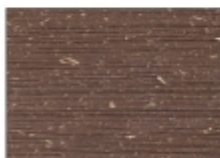

It is possible to manufacture a GlobalDeck elevation board in custom sizes, per the client's request.

TYPE OF THE GLOBALDECK ELEVATION BOARD	CROSS SECTION	COLOUR
EI190 	 <p>↔ 190mm ↓ 12mm</p>	hazel graphite brown
EI120 	 <p>↔ 120mm ↓ 14mm</p>	

Trimming (structure) of the surface of the GlobalDeck elevation boards:

☐ Brushed surface

☒ Polished surface

FENCING SYSTEM

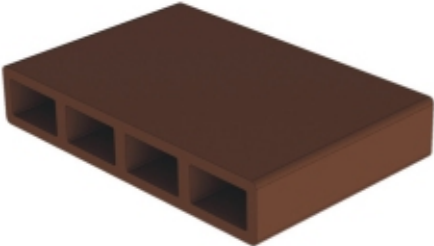

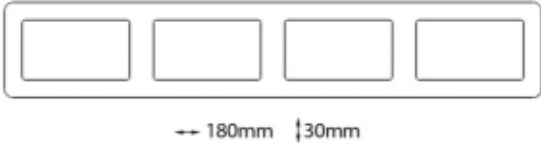

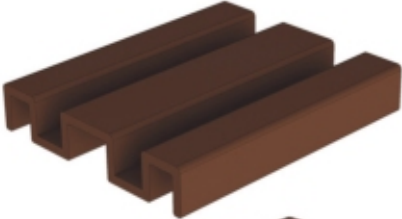

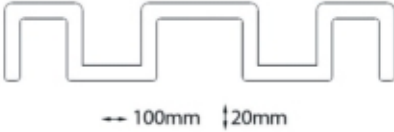

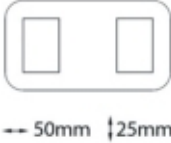

(fences, balustrades, barriers)

The GlobalDeck FENCING PANELS are an alternative to traditional wooden or steel fences and balustrades. The variety of patterns and colours of the GlobalDeck fencing panels allows for their application in every architectural styles. The GlobalDeck fencing system makes it possible to choose installation method: horizontal or vertical. It is possible to build fences and barriers with a solid or open-work structure.

The COMPOSITE BARRIERS made with the GlobalDeck fencing panels are best for separating areas and dividing space, e.g. a balcony, a terrace or a garden. Thanks to their high usability parameters they can also serve as a barrier against wind and rain.

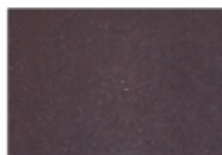

The variety of patterns, colours and structures of the GlobalDeck panels allows for the creation of any space. The possibility of making an open-work structure makes it possible to divide an area with maintaining the passage of light and air circulation.

The FENCE panels give a unique 3-D effect thanks to their structure.

TYPE OF THE GLOBALDECK FENCING BOARD	CROSS SECTION	COLOUR
LAW 		hazel graphite brown
FENCE 		
PG 25 		

Trimming (structure) of the surface of the GlobalDeck fencing boards:

■ Smooth surface

□ Brushed smooth surface

■ Polished smooth surface

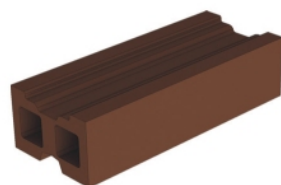

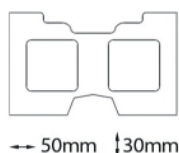

Assembly kit Globaldeck

(basic elements of our system)

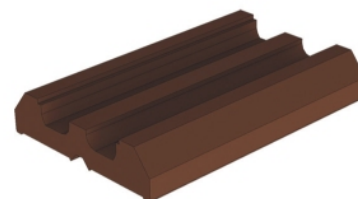

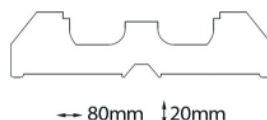

The GlobalDeck ASSEMBLY KIT contains joists, finishing strips and clips which are used during the installation of our terrace, elevation and fencing systems.
